HVAC - Common Mistakes

These typical HVAC installation errors might cost you dearly :

- ☐ Choosing the wrong Capacity.
- ☐ Poor Air Distribution Design.
- ☐ Faulty Duct Installation technique.
- ☐ Poorly designed drain systems.
- ☐ Incorrect Exhausts.
- ☐ Undersized or Oversized Ductwork.

Why Excelsource ?

We think of a project as a journey, and the fusion of our processes, guiding principles, and the appropriate technology enables us to make this journey more accurate and cost efficient.

Your new unit will be adjusted and tuned in accordance with the requirements of your space and the manufacturer's specifications when it is installed by HVAC professionals who are familiar with the equipment and your demands. Because of this, there is less part wear and tear and the machinery operates more consistently. You may double the life of your equipment and have fewer breakdowns.

Excelsource is where you'll get one stop solution of your HVAC requirements i.e Efficient Planning, Execution and Delivery with High Quality working procedures, reliability of material and project execution quality, cost control, proper safety compliances, adherence to project schedule and Instant responses and correspondences.
