Excelsource
Industries Private Limited

ABOUT US

Welcome to Excelsource International Private Limited (EIPL), a trailblazer in engineering, technology, and innovation since 2003. From humble beginnings as a sourcing solutions provider, we've evolved into a dynamic force, recognized for end-to-end solutions in India and Africa.

OUR COMPANY PHILOSOPHY

At EIPL, actions speak louder than words. Our diverse team, including engineers, consultants, and procurement professionals, delivers tailored solutions with a commitment to excellence, innovation, and technology.

OUR HISTORY

From our inception, we've grown from a sourcing solutions provider into a thriving entity embracing engineering excellence and innovation. Our evolution includes project management, EPC services, and a culture centered on exceeding client expectations.

MISSION

Dedicated to pioneering customer satisfaction through innovative sourcing solutions, our success is intertwined with our customers and suppliers thriving. We uphold the highest standards of service, reliability, and integrity, ensuring profitable growth and adding consistent value.

VISION

Pioneering customer satisfaction through innovative sourcing solutions, we aim to be strategic partners, keeping clients at the forefront of industry advancements, delivering value at every step.

THE FUTURE

Since early 2019, EIPL has embraced continuous enhancement, extending services globally. Our focus includes IoT-based Industry 4.0 solutions, Smart City Projects, Smart Metering Infrastructure, and resource conservation through advanced technologies.

VALUES

Rooted in Quality, Respect, Trust, Ownership, and Integrated Teamwork, these values drive our business success.

Join us on a journey of engineering excellence and innovation, where we're not just solution providers but strategic partners, ensuring clients lead in industry advancements.

“Excelsource International: Your Gateway to Global Procurement & Exports”

Are you ready to take your business to new heights? Excelsource International is your trusted partner for seamless global procurement and exports.

Export Partnership Made Easy

Not Export Ready? No worries! If you're eager to export but lack the necessary systems, partner with us to export your goods efficiently. We handle the complexities, ensuring your products reach the global market with ease.

White Labeling Opportunities for Manufacturers

Are you a manufacturer of top-notch engineering goods? We specialize in preparing manufacturers for new white-labeling opportunities with our extensive network of export clients. Elevate your brand and tap into new markets with Excelsource International.

Empowering Social Entrepreneurs

Our foundation welcomes social entrepreneurs dedicated to environmentally friendly technologies, small businesses, women entrepreneurs, and sustainable living. Join us in making a positive impact on the world through responsible business practices.

Mentoring and Investment for Startups

Seeking guidance and investment for your startup? Our founders and directors are committed to mentoring startups, providing equity investments, and guiding through fundraising rounds. Let's build and expand your business together.

WHY WORK WITH EXCELSOURCE

- ♦ **Seasoned Professionals:** Benefit from the expertise of seasoned professionals in the business of exports.
- ♦ **Expert Teams:** Our dedicated teams excel in procurement, logistics, export documentation, and compliance.
- ♦ **Quality Assurance:** Trust our in-house quality control and testing team for the highest standards.
- ♦ **Global Reach:** Access a strong export clientele in emerging markets and industries.

Export & Procurement

“Elevating Global Excellence Through **Sustainable Procurement** - Where Integrity, Innovation, & **Environmental Responsibility** Redefine **Partnerships Worldwide**. ”

Our Philosophy

At Excelsource, our philosophy is rooted in the transformative power of reliable procurement and exports. Originating in the mining industry, we've evolved into a beacon of excellence across diverse sectors. Committed to delivering superior solutions with integrity, innovation, and unparalleled service, we stand as a trusted partner for clients globally. Our values transcend borders, making Excelsource synonymous with excellence, reliability, and environmental responsibility.

For various industries we serve **EPC (Engineering, Procurement, & Construction)**:

Our single-point responsibility ensures seamless project execution with state-of-the-art technology integration and best-in-class engineering practices.

What We Offer:

Industries We Serve and Comprehensive Product Offerings:

Mining and Mineral Processing:

From machinery to spares, we provide comprehensive solutions for mineral processing, including prefabricated plant buildings, material handling systems, agitator leaching units, pumps, valves, instruments, piping, fittings etc and more.

Pharmaceuticals and Chemical Industry:

Elevating Your Industry with Precision Equipment. Specialized in sourcing high-quality machinery and materials for pharmaceutical and chemical manufacturing. Your success, our commitment

Food and Beverages Production: Your Global Partner in Food & Beverage Production. Tailored procurement and export of precision machinery and packaging solutions for streamlined beverage production worldwide.

Agriculture: Elevate productivity with our reliable sourcing of heavy and light agricultural equipment, irrigation systems, and accessories. Export excellence for a thriving global agri-future.

Electrical Power Generation and Transmission: Empowering Electrical Infrastructure Globally. Unmatched expertise in sourcing and delivering comprehensive solutions for power generation, transmission, and distribution projects, ensuring reliable energy access worldwide.

FEATURES AND BENEFITS:

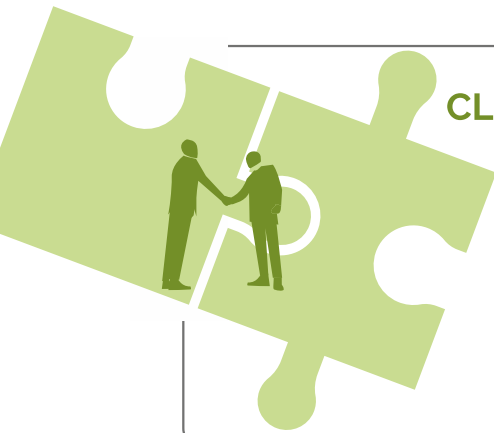

Single-Point Responsibility-Assured: Experience peace of mind with our end-to-end solutions, offering a single point of responsibility for seamless project execution.

Cost and Time to Completion-Guaranteed: We prioritize timely and budget-friendly deliveries, ensuring project success.

State-of-the-Art Technology-Committed: Stay ahead with cutting-edge technology integrated into our solutions.

Engineering Practices-Best-in-Class: Benefit from industry-leading engineering practices, exceeding global standards.

Peace of Mind - Guaranteed: Trust in Excelsource for reliability, integrity, and expert dedication to your project's success.

Energy Audit & Heat Pump Solutions

“Crafting Sustainability Solutions -
Optimizing Energy, Reducing Waste,
& Nurturing a Greener Tomorrow.”

Our Philosophy

At Excelsource International, we embrace a philosophy rooted in sustainable energy practices. Our commitment revolves around the notion of heat conservation— an approach that involves optimizing energy utilization to reduce energy requirements per unit of output. We strive to achieve and maintain the ideal balance of energy procurement and utilization, aiming to minimize energy costs, waste, and environmental impact without compromising production efficiency and quality.

Energy Audit stands at the forefront of our sustainability initiatives, embodying our dedication to efficient energy management. This service is designed to assess, optimize, and enhance energy utilization throughout an organization. Our comprehensive approach includes walk-through audits, detailed audits, pinch analysis, and the identification of low-grade heat sources within the setup.

Walk-Through Audits:

Our audits begin with a walk-through, evaluating current energy consumption and identifying opportunities for improvement.

Detail Audits:

In-depth audits delve into intricate energy consumption patterns, providing detailed findings and actionable recommendations.

Pinch Analysis:

Conducting pinch analysis helps identify gaps in the heat profile, enabling us to suggest improved heat distribution for optimized energy consumption.

Low - Grade Heat Utilization:

We specialize in finding low-grade heat within the setup and offer innovative solutions, such as utilizing ORC, chilled water generation, or heating buildings using hot water.

Excelsource Industries offers a range of solutions to optimize energy usage:

- ◆ Heat Recovery
- ◆ Chilled Water Vacuum System
- ◆ Heat Pump
- ◆ Flash Steam Recovery
- ◆ Condensate Recovery

HEAT PUMP SOLUTIONS:

Versatility:

Heat Pump serves as a multifunctional solution, seamlessly operating as both a chiller and boiler. It offers cooling, heating, or simultaneous operations, providing businesses with unparalleled flexibility.

Sustainability:

With waste heat recovery and absorption techniques at its core, the Heat Pump Chiller aids industries in reducing energy consumption and carbon emissions, making it a pivotal sustainable solution.

HVAC Solutions

“**Excelsource**
STRIVE TO PROVIDE
Technically Reliable HVAC Solutions”

Our Philosophy

When it comes to HVAC, we always prioritize the requirements of our customers first. Our team designs the system with the client's long-term Capital, Operational and Maintenance costs in mind.

HVAC DESIGN

- ◆ HVAC System Design
 - VRF / VRV
 - Chillers
 - Precision HVAC Systems
 - Kitchen Ventilation
- ◆ BOQ Calculations
- ◆ Heat Load Calculations
- ◆ QC Parameters
- ◆ Time lines and Scheduling
- ◆ Budgeting

HVAC INSTALLATIONS

- ◆ Material Procurement
- ◆ QC Audits of Material
- ◆ Site Safety Management
- ◆ Project Execution
 - VRF / VRV
 - Air & Water Cooled Chillers
 - Ductable
- ◆ Ducting
- ◆ Electrical
- ◆ AHU's
- ◆ Ventilation Systems

CLEAN ROOMS

- ◆ Design
- ◆ Material Procurement
- ◆ QC Audits of Material
- ◆ Site Safety management
- ◆ Project Execution
 - Doors / Panels / Windows & Viewing Panels
 - Ceiling and Flooring
 - AHU's
 - Ventilation Systems
 - Air Extraction Systems
- ◆ Electrical

Who we are

We are an HVAC contracting company that does project design, project management, material procurement, and project execution across multiple sectors in India and Africa. We customize each project's design and execution by understanding and applying the right HVAC technologies. Our processes offer real-time project status reporting and transparency across all project stakeholders.

WE SERVE (India & Africa)

- ♦ HVAC Designing
- ♦ Clean Room Designing
- ♦ AHU's, Air Washers, Ventilation Systems
- ♦ Repairs, Maintenance and AMC's
- ♦ Integrations & QC of existing projects
- ♦ HVAC & Clean Room Installations
 - VRF / VRV Systems
 - Air & Water Cooled Chillers
 - Ducting & Insulation

TESTIMONIAL

“

“The work that Excelsource International did for our manufacturing plant exceeded my expectations. Our forthcoming GNAL Plant in Dahej. The HVAC system was designed, installed and commissioned on schedule thanks to their efforts. Their team is top-notch in every way, from their professionalism to their extensive knowledge to their meticulous attention the detail. They communicated well and finished the job efficiently.”

Big Dish (Solar Concentrator)

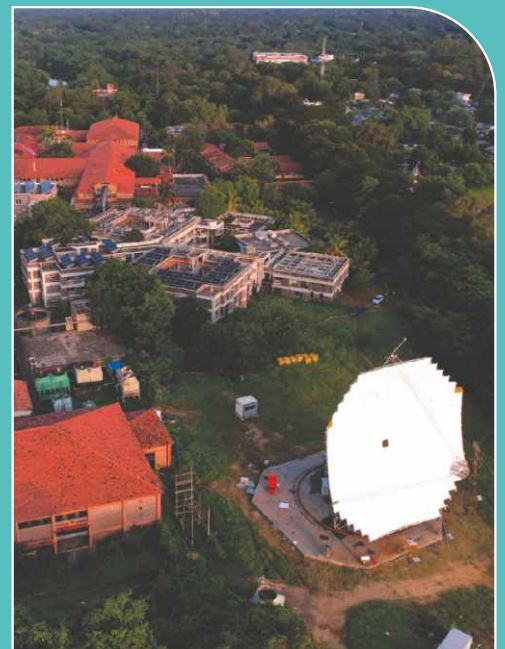

“ Illuminating Tomorrow with the
Big Dish Solar Concentrator.

Leading the way in sustainable energy, innovation,
& global collaboration for a brighter, greener future. ”

Our Philosophy

At Excelsource International, our philosophy centers around pioneering sustainable and high-performance energy solutions. Anchored by the Australian National University (ANU) and Sunrise CSP/EIPL Australia, our commitment is evident in the development of the Big Dish solar concentrator – the world's largest and most efficient dish concentrator. We bring this cutting-edge technology to India, fostering innovation, sustainability, and global collaboration in the renewable energy sector.

The Big Dish solar concentrator stands as a testament to innovation, bringing forth a new era in solar thermal energy. This colossal concentrator is designed to deliver steam to various applications, from factories and villages to grid-scale electricity generation plants. Manufactured in India, the Big Dish operates with superior optics, capable of generating steam up to 600°C and 160 bar pressure. Its versatility extends to district heating/cooling, industrial process heat, and power generation. Beyond its current applications, the dish's exceptional optics enable the generation of heat up to 2,000°C at its focus, opening doors to future applications in thermochemistry and materials processing – including hydrogen, ammonia, syngas production, and the sintering of metals and ceramics.

Features and Benefits:

Modular, Scalable, and Adaptable Solutions: The Big Dish offers modular, scalable, and adaptable thermal energy solutions for heating, cooling, and electricity generation. Its versatility ensures flexibility in meeting various energy needs.

Competitive Cost: We prioritize cost competitiveness with fossil fuels and alternative energy sources. Our goal is to provide economically viable solutions that make renewable energy accessible and cost-effective.

Tailored Business Solutions: Understanding the unique needs and capabilities of our customers, we provide business solutions tailored to meet specific requirements. From Engineering, Procurement, and Construction (EPC) to Operations and Maintenance (O&M) services, we offer a comprehensive suite of services.

SG-4 Big Dish Overview: The SG-4 Big Dish is the epitome of solar concentration technology. It boasts highly accurate optics, ensuring the highest-efficiency conversion of sunlight to thermal energy. Equipped with a dual-axis tracker, the system intelligently follows the sun's position, optimizing solar irradiation reception.

Solar Concentration Process: The Big Dish employs a set of 380 concave mirrors arranged parabolically, focusing solar irradiation onto a designated focal point. At this focal point, a uniquely designed receiver facilitates the conversion of water into superheated steam (dry steam).

EWS (Excelsource Water Solutions)

“**Excelsource Water Solutions:** Nurturing Sustainable Water Solutions for a Greener Tomorrow. Leading with innovation and commitment to eco-friendly water treatment, one drop at a time.”

Our Philosophy

At Excelsource Water Solutions, our philosophy revolves around the transformative power of sustainable water solutions. We believe that access to clean and healthy water is a fundamental right for all. Our commitment is to provide innovative water treatment solutions that not only address specific issues but also contribute to a sustainable and eco-friendly future...

WHAT WE OFFER:

Excelsource Water Solutions's commitment to water treatment excellence spans various sectors, including residential, commercial, industrial, and agricultural. Leveraging a proven track record, we've earned the trust of our clients by delivering state-of-the-art water solutions for comprehensive and sustainable water management. Explore our range of innovative products and services:

- **Water Softening and Conditioning:**
 - Tailored solutions for tackling hard water issues
 - Ensures clean and healthy water for residential, commercial, industrial, and agricultural applications
- **Sewage Treatment Plants (STP) and Effluent Treatment Plants (ETP):**
 - Comprehensive solutions for effective sewage and effluent treatment
 - Contributes to a cleaner and healthier environment
- **Gray Water Treatment Plants:**
 - Sustainable treatment solutions for gray water
 - Promotes water reuse and conservation

REVOLUTIONARY SOLUTIONS:

ECO-STP:

- ♦ A revolutionary and maintenance-free solution
- ♦ Advances in cutting-edge and eco-friendly water treatment
- ♦ Operates without moving parts, ensuring efficiency and longevity
- ♦ No manual intervention is required, minimizing operational hassles
- ♦ Eliminates odor discharge for a pleasant environment
- ♦ The impressive life cycle of over 25 years, ensures long-term benefits
- ♦ Self-sustaining design requires no external power source

Excelsource Industries takes pride in leading the way toward a cleaner and greener future with ECO-STP, prioritizing environmental conservation and offering sustainable, low-maintenance sewage treatment solutions.

EWS Water Conditioners and Softeners:

- ♦ Targets hard water, high TDS, and scaling issues
- ♦ Ensures scaling-free, hygienic water from any faucet on your premises
- ♦ Designed for easy installation in both old and new buildings
- ♦ Utilizes state-of-the-art Magnetic and catalytic innovation with micro dosing technology
- ♦ Provides efficient treatment for ground (bore) wells, municipality water, or any water source

No water wastage or addition of salt and harmful chemicals, promoting a sustainable water treatment solution.

Metering Solutions (Metelity & CiMi)

“**Excelsource Metering Solutions:**
Pioneering Sustainability in Utility Management.
Revolutionizing metering for a smarter,
greener future, one innovation at a time.”

Our Philosophy

At Excelsource Industries, sustainability is ingrained in our ethos. We believe in revolutionizing utility metering solutions to not only meet current demands but to pioneer a sustainable future. Our commitment extends beyond efficient metering; each innovation we introduce is a stride towards resource conservation, reduced environmental impact, and a smarter, sustainable world. We take pride in contributing to initiatives that promote positive change, ensuring a harmonious balance between technological progress and environmental responsibility. Together, we are charting a course towards a future where utility metering is a cornerstone in the sustainable management of vital resources.

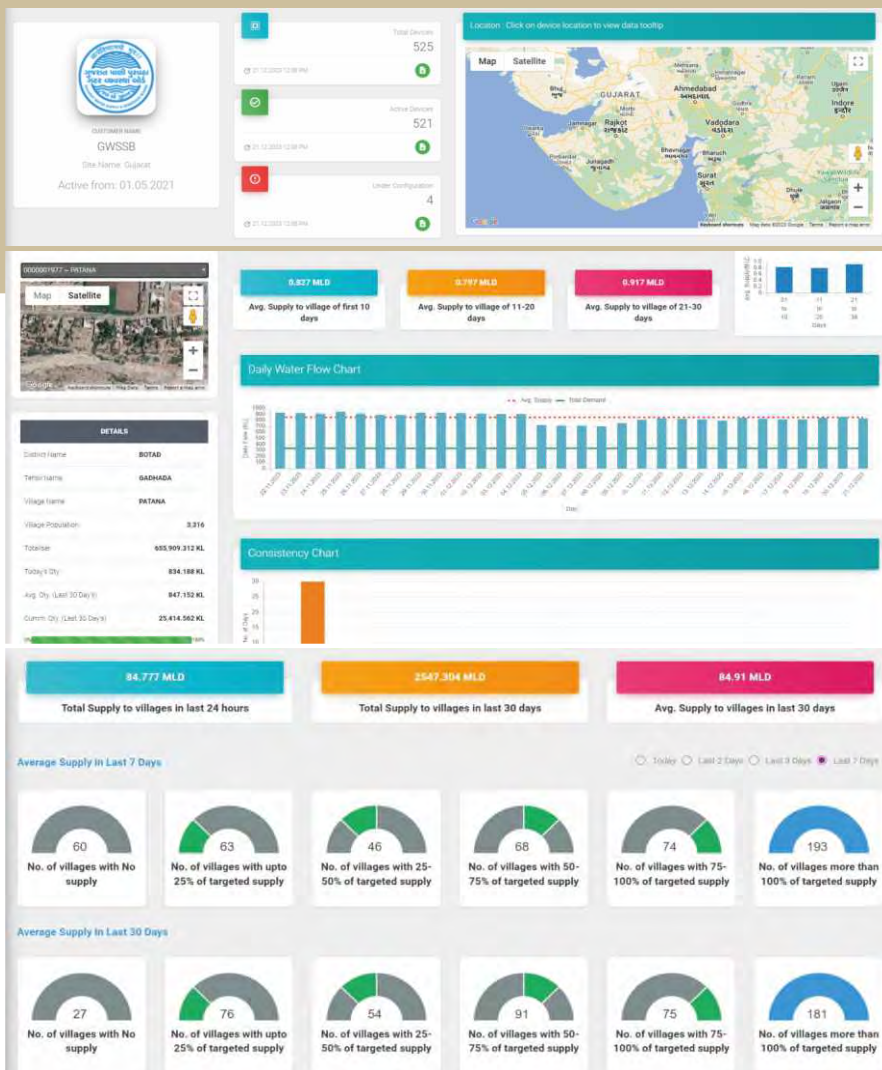

OUR METERING SOLUTIONS:

About Metelity:

Excelsource's Metelity stands as a cutting-edge cloud platform, redefining AMI and AMR for precise measurement, monitoring, and control of Energy, Water, and Gas utilities. Whether you seek a mobile meter reading solution (AMR), a robust communications network (AMI), or a seamless combination of both, Metelity provides tailored solutions for energy efficiency, ensuring sustainable utility metering.

About Ci-Mi:

As the Government of India ambitiously plans to replace 25 Crore existing meters, EIPL's Ci-Mi steps in as a vital force in this transformative journey. Serving as a cornerstone in this national initiative, Ci-Mi provides skilled technical workforce for consumer indexing and meter installation, facilitating the transition to a sustainable and efficient metering landscape in Gujarat and Maharashtra. Under the collaborative umbrella of Intellismart, Iskar, Emeco, Adani Electrical, and GMR, Ci-Mi is a beacon of sustainability in utility metering.

CASE STUDY

The GWSSB-Smart Metering Project, in partnership with EIPL, aimed to revolutionize water management in Gujarat. Installing over 525 GPRS-enabled Ultrasonic Flowmeters and deploying the METELITY IoT Platform significantly improved water flow monitoring and data retrieval. These innovations ensured precise readings and robust automation, fostering transparent billing and responsible water usage. Overcoming challenges of stakeholder persuasion and infrastructure complexities, the initiative established a resilient network covering nearly 50,000 sq. km. Collaborating with local associations emphasized community involvement, enhancing water resource management effectiveness. This successful partnership signifies a milestone in sustainable water management, showcasing commitment to efficiency, reliability, and community engagement.

Solutions for Edible Oil Refineries

“Sustainably Transforming Plants for Maximum Efficiency. Precision, innovation, and commitment converge for holistic, **Eco-friendly refinery solutions** with lasting impact.”

Our Philosophy

At Excelsoure International, our philosophy in Edible Oil Refinery Solutions centers around unlocking the full potential of your plant with a sustainable and efficient approach. We believe in the transformative power of capacity debottlenecking, utilizing strategic improvements to enhance operational efficiency without compromising sustainability. We believe in a holistic approach that integrates efficiency enhancements with a commitment to environmental stewardship. Our philosophy is centered on precision, innovation, and a dedication to making your plant not just productive, but also sustainable for the long term.

Excelsoure International stands as a leader in Edible Oil Refinery Solutions, providing a comprehensive suite of services that include capacity debottlenecking, design, engineering, project management, and operational support. With over a decade of rich experience in both African and Indian regions, we have emerged as the preferred EPC contractor, delivering excellence through technical expertise and best practices.

What We Offer:

Capacity Debottlenecking Services: Unlock the latent potential of your plant with our meticulous capacity debottlenecking services, comprising:

- ♦ A thorough examination of current operations.
- ♦ In-depth bottleneck analysis of plant operation parameters.
- ♦ Tailored suggestions for improvement, emphasizing low-hanging fruits and immediate action plans.
- ♦ Precision-crafted engineering package development for seamless capacity enhancement.
- ♦ Innovative Solution- Caviroto, Chilled Water Vacuum System, heat recovery solutions.

Design, Engineering, Project Management & Implementation: As your end-to-end partner, we deliver quality through best practices in Structural, Mechanical, Electrical, Civil, and Pre-Engineering Building disciplines.

Operational Support & Upgradation: Beyond project completion, we provide ongoing operational support and upgradation services, ensuring your plant's sustained efficiency and adaptability.

FEATURES AND BENEFITS:

Cost-Effective Solutions: Our focus on low-hanging fruits and immediate action plans ensures capacity enhancement with minimal financial impact.

Optimized Operations: By addressing bottlenecks and implementing improvements, our goal is to optimize your plant's operations, leading to increased efficiency and productivity.

Quick Implementation: Emphasis on immediate action plans means that improvements can be swiftly implemented, delivering rapid results for your organization.

Customized Approach: Understanding the uniqueness of each plant, our solutions are tailored to address specific needs and challenges, ensuring a customized and effective approach to capacity debottlenecking.

“ Revolutionizing **Power Distribution** for Sustainability. **Our 11 KV RCDS Automation System** ensures reliability, efficiency & uninterrupted power, shaping a **greener energy future** ”

Our Philosophy

At Excelsource Industries, we believe in redefining the norms of power distribution. Our philosophy revolves around creating innovative solutions that not only address challenges but also contribute to a sustainable and reliable energy landscape. With a commitment to excellence and a focus on sustainability, we introduce our 11 KV RCDS Smart Distribution Automation System – a game-changer in the field of power distribution.

About RCDS:

Excelsource has pioneered a cost-effective 11 KV RCDS Smart Distribution Automation System, revolutionizing power supply system. This innovative solution swiftly isolates faulty sections of 11 KV feeders without disrupting the power supply to consumers in healthy sectors. Complemented by our web-based "Supply and Feeder Restoration Automation Software" (SARAS), enabling SCADA compatibility and cloud connectivity, Excelsource ensures 24x7 monitoring and remote operations. Our integrated approach signifies a commitment to cutting-edge technology, enhancing efficiency, and providing an uninterrupted and reliable power distribution network for a sustainable future.

What We Offer:

Excelsource Industries offers a comprehensive package – the 11 KV RCDS with FRTU & SARAS Software System. This integrated solution comprises advanced features, from Vacuum Interrupter and Battery Backup Systems, Hydrophobic Cycloaliphatic Epoxy Bushings. Our web-based Field Remote Terminal Unit (FRTU) with SARAS software to enhance operational efficiency and monitoring capabilities.

COMPONENTS

Vacuum Interrupter Technology: The RCDS incorporates advanced Vacuum Interrupter Technology, ensuring reliable operations and fault isolation.

Battery Backup System: Equipped with a robust battery backup, our system ensures failsafe closing and tripping operations, guaranteeing an uninterrupted power supply.

Hydrophobic Cycloaliphatic Epoxy Bushings: Designed for sustainability, our RCDS features hydrophobic epoxy bushings with excellent electrical insulation properties, ensuring durability.

Web-Based FRTU: The Field Remote Terminal Unit facilitates remote operations, including Connect/Disconnect and Trip, and enables auto-reclosing in transient fault conditions.

SARAS Software: Our Supply and Restoration Automation System (SARAS) software, with SCADA compatibility and cloud connectivity, empowers efficient operations and monitoring.

Real-time Monitoring and Logging: Parameters such as switch position, local/remote status, battery voltage, and UPS health are logged and displayed in real-time, ensuring proactive management.

GPS Coordination and Mapping: GPS coordinates of each RCDS are displayed on Google Maps, providing visual status and aiding in quick identification.

Operational Accessibility: Our web interface and mobile app enable easy monitoring of RCDS status, allowing line staff and engineers to stay connected on the go.

Multilevel Operational Security: With multilevel security codes and AES 128 Bit encryption, our system ensures operational safety and secure remote communication.

“Precision Power for a **Sustainable Future.**
Elevating power quality with the
Intelligent Reactive Compensation Unit-
where sustainability meets innovation.”

Our Philosophy

At Excelsoure Industries, our vision transcends conventional power management. Introducing the Intelligent Reactive Compensation Unit (iRCU), we envision a future where precision, sustainability, and innovation converge to redefine the standards of power quality in industry and agriculture.

About:

As the driving force behind the iRCU, Excelsoure Industries is committed to breaking new ground in power management. With cutting-edge technology and unwavering customer support, our journey is marked by a dedication to sustainability. The iRCU is not just a product; it's a testament to our relentless pursuit of excellence.

FEATURES AND BENEFITS:

Precision in Parameter Measurement: iRCU ensures accurate measurement of all electrical parameters for informed decision-making.

Real-time Analysis for Informed Decisions: Measured data is instantly transmitted to dedicated software, allowing real-time analysis and optimization.

Efficient Reactive Power Compensation: The system calculates and displays required capacitor values for optimal reactive power compensation.

Device Protection and Warning System: Monitors device-rated values, triggers warning alarms when limits are exceeded, and safeguards devices by cutting off the power supply.

Flexible Multi-Step Capacitor Switching: Offers flexibility with multi-step capacitor switching based on load, ensuring optimal power factor correction.

Remote Calibration and Dynamic Adjustments: Enables hassle-free remote calibration and dynamic adjustment of power factor values through user-friendly software.

Enhanced Energy Efficiency: Reduces transmission copper loss, enhances overall efficiency, and recommends active power balance for energy conservation.

Data Security Measures: Incorporates robust data security measures to safeguard sensitive information and ensure confidentiality.

Continuous Customer Support: Beyond product delivery, our commitment extends to ongoing customer support for a seamless and efficient experience.

Case Study

Excelsource's Intelligent Reactive Compensation Unit (iRCU), developed with Delving R&D, optimizes power for large agriculture consumers. The hardware-firmware system, implemented in the 11 KV Malikhedi Irrigation feeder, dynamically enhances power factor, cuts losses, and boosts efficiency. Its software enables real-time monitoring, theft detection, and outage management. iRCU's tangible benefits include improved power factor, reduced losses, and increased efficiency, while intangible benefits encompass theft detection and outage management. This innovation stands as a transformative solution for energy optimization, poised to revolutionize agriculture's energy landscape.

Chemical Solutions

“Redefining Quality,
Customizing Solutions,
& Leading Sustainability in
Chemical Procurement &
Trading for a **Global Marketplace.**”

Our Philosophy

Welcome to Excelsource Chemicals, where we pioneer sustainability, innovation, and reliability, revolutionizing the chemical industry with tailored, high-quality solutions.

About the Service:

Empowered by innovation, sustainability, and unparalleled expertise, Excelsource Chemicals stands as a pioneering force committed to redefining industry norms. We aim to revolutionize the chemical landscape by offering a diverse and sustainable portfolio. As a dedicated Supplier and exporter, we cater to global demands with a comprehensive range of high-quality, environmentally friendly, and cost-effective chemical solutions. Our goal is to address the ever-evolving needs of the global marketplace.

What We Offer:

Explore our wide range of chemical solutions spanning industrial acids, water treatment, food and beverages, textiles, oil and gas, and more. Our diverse product portfolio is designed to meet specific requirements across various industries, ensuring environmental friendliness, cost-effectiveness, and reliability. Some of the industries we serve are as follows:

INDUSTRIAL ACIDS (Hydrochloric Acids, Sulphuric acid, Nitric acid, Formaldehyde, Oxalic Acid)

FOODS & BEVERAGES (Acetic acid, Phosphoric acid, Sodium Bicarbonate, Citric acid, Maize Starch, Sorbitol (Liquid/ Powder))

WATER TREATMENT (Aluminium Sulphate, Ferric Chloride, Poly Aluminium Chloride, Sodium Metabisulphite, Calcium Hypochlorite, Trisodium Phosphate, Activated Carbon)

FERTILIZER & ANIMAL FEED (Manganese Sulphate, Zinc Sulphate, Manganese Oxide, Manganese Carbonate, Ferrous Sulphate, Ethylenediamine Tetraacetic Acid – EDTA, Copper Sulphate, Manganese Chloride)

TEXTILES (Acetic acid, Hydrogen Peroxide, Nonyl Phenol Ethoxylate, Sodium Hypochlorite, Stable Bleaching Powder, Sodium Sulphate Anhydrous)

OIL & GAS (Hydrochloric acid, Benzalkonium Chloride (BKC), Potassium Chloride, Sodium Cyanide, Copper Sulphate, Calcium Chloride, Xanthan Gum, Guar Gum, Poly Aluminium Chloride)

FEATURES AND BENEFITS:

Customized Solutions: Tailored chemical elements based on your unique requirements, ensuring precise compatibility and effectiveness.

Trusted Manufacturers: Sourcing only from the most trusted manufacturers, we ensure the highest quality standards in every chemical product.

Premium Quality Assurance: Committed to excellence, we guarantee premium quality products that meet or exceed global industry standards.

Single-Point Responsibility: Experience seamless project execution with a single point of responsibility, ensuring peace of mind.

Cost and Time Guarantee: Prioritizing budget-friendly and timely deliveries to ensure project success.

Comprehensive Portfolio: Offering a diverse range of high-quality, environmentally friendly, and cost-effective chemical solutions across various industries.
